	(2014)				
USDVA (from ICV)	Suicide Data Report, 2012	This reports is an initial attempt to provide an overall picture of Veteran suicide to drive suicide prevention program development.	Initial report done in 2012. A follow up was done in 2014 (see below) and a 2016 update is anticipated later this year.	Digital	<a href="http://www.va.gov/opa/docs/suicide-data-report-2012-final.pdf">http://www.va.gov/opa/docs/suicide-data-report-2012-final.pdf</a>  Fred MacRae, USDVA Suicide Prevention Coordinator, Palo Alto VHA. (650) 852-3337, Frederick.Macrae@va.gov
USDVA (from ICV)	Suicide Rates in VHA Patients through 2011 with Comparison with Other Americans and other Veterans through 2010	This briefing provides additional information related to the VA Suicide Data Report, 2012. Data has been obtained from the CDC and several States; this now allows us to look at Veteran suicide rates in comparison with the general population and compare Veterans who get care in the VHA with those who do not.	See USDVA Suicide Data Report, 2012 listing.	Digital	<a href="http://www.mentalhealth.va.gov/docs/Suicide_Data_Report_Update_January_2014.pdf">http://www.mentalhealth.va.gov/docs/Suicide_Data_Report_Update_January_2014.pdf</a>
USC (from ICV)	Well-Being and Suicidal Ideation of Secondary School Students From Military Families	Findings emphasize the increased risk of mental health issues among youth with parents (and siblings) in the military. Systematic referral systems and collaboration with community-based mental health centers will bolster screening services.	2013	Digital	<a href="http://www.jahonline.org/article/S1054-139X(13)00502-8/pdf">http://www.jahonline.org/article/S1054-139X(13)00502-8/pdf</a>
USC (from ICV)	Suicidality among military-connected adolescents in California schools	Military-connected youth statewide are at a higher risk for suicidal ideation, plans, attempts, and attempts	2015	Digital	<a href="http://link.springer.com/article/10.1007/s00787-015-0696-2">http://link.springer.com/article/10.1007/s00787-015-0696-2</a>

		requiring medical care because of suicidal behaviors. It is suggested that policies be implemented to increase awareness and screening among primary care providers, school personnel, and military organizations that serve military-connected youth.			
The Joint Commission (from ICV)	Sentinel Event Alert 56: Detecting and treating suicide ideation in all settings	The rate of suicide is increasing in America. Now the 10th leading cause of death, suicide claims more lives than traffic accidents and more than twice as many as homicides. At the point of care, providers often do not detect the suicidal thoughts (also known as suicide ideation) of individuals (including children and adolescents) who eventually die by suicide, even though most of them receive health care services in the year prior to death, usually for reasons unrelated to suicide or mental health.	2016	Digital	
Private Sector (from ICV)	Suicide among male veterans: a prospective population-based	With the projected rise in functional impairments and psychiatric morbidity among veterans of the conflicts in	2007	Digital	<a href="http://www.ncbi.nlm.nih.gov/pmc/articles/PMC2465754/">http://www.ncbi.nlm.nih.gov/pmc/articles/PMC2465754/</a>
